

Innovative RNA: From basic discoveries to future medicine

14th
Berlin Summer Meeting
18 June 2021

Organizing Committee:

Emmanuelle Charpentier
Max Planck Unit for the Science of Pathogens

Markus Landthaler
BIMSB, MDC

Nikolaus Rajewsky
BIMSB, MDC

Jörg Vogel
HIRI Würzburg

Contact:

Irena Perko Radulovic
irena.perkoradulovic@mdc-berlin.de
Petya Jordan
petya.jordan@mdc-berlin.de

Speakers:

Matthew Disney
Scripps Research, Jupiter, FL, USA

Narry Kim
Seoul National University, South Korea

David Liu
Harvard University, Cambridge, MA, USA

Mano Manoharan
Anylam Pharmaceuticals, Cambridge, MA, USA

Jennifer Petter
Arrakis Therapeutics, Waltham, MA, USA

Oliver Rausch
Storm Therapeutics, Cambridge, United Kingdom

Cynthia Sharma
Würzburg University, Germany

Yossi Weizmann
Ben-Gurion University of the Negev, Beersheba, Israel

RNA editing, siRNA/antisense, mRNA vaccines, RNA modification & enzymes,
RNA structures as drug targets, RNA nanodevices & -technology, RNA in extremophiles

Registration:
